

NICK BINNS
Business Services Manager

Q. Tell us about your experience prior to joining Super Cheap Auto?

A. I have a B.Sc. (Hons) in Mechanical Engineering. I commenced my career as a Development Engineer with British Aerospace Corporation and then spent five years with the Hughes Aircraft Corporation as a Project Manager involved with the design, manufacture and testing of flight simulators. In the seven years prior to joining Super Cheap Auto, I worked with a firm of international management consultants focusing on process, system and change management. I joined Super Cheap Auto in 2001.

What are your major responsibilities?

I have overall responsibility for process development and information technology, most recently project managing the implementation of the Company's business process reinvention including the implementation of SAP IS Retail.

Why do you work for Super Cheap Auto?

The experience of helping to build a dynamic retailing business that is an Australian success story, providing opportunities for the community.

What was your highlight of 2003/04?

The successful opening of our first seven stores in New Zealand on one day.

What is your favourite Super Cheap Auto product?

The vast array of storage boxes is hard to beat and useful in so many ways.
