

The sum of all quality award criteria (1 – 5) gives a maximum possible total of 420 points.

Tenderers must provide a detailed technical offer addressing all points in the technical specifications, case studies and each of the quality award criteria. Repetition of mandatory requirements in the technical specifications without providing detail in the technical offer will only result in a very low score.

Quality award criteria thresholds: Offers must score at least the minimum level of quality described for each criterion and sub-criterion, unless otherwise specified in the criterion description.

Tenders that do not reach these minimum quality thresholds will be eliminated from the subsequent stages of the evaluation process.

B) PRICE AWARD CRITERION (200 points)

Tenders which passed the quality thresholds will be further assessed to ensure:

- I. the price offer is made within the maximum budget for financial offers indicated in the tender specifications and;
- II. the financial offer satisfies the formal requirements of the tender specifications.

The price score will be calculated according to the below formulas:

1. Points for profile "Senior expert" Intramuros, (maximum possible 30):
 - Formula: $30 * \text{lowest daily rate offered among the tenderers who passed the quality award criteria thresholds} / \text{daily rate offered for offer under evaluation}$
2. Points for profile "Senior expert" Extramuros, (maximum possible 70):
 - Formula: $70 * \text{lowest daily rate offered among the tenderers who passed the quality award criteria thresholds} / \text{daily rate offered for offer under evaluation}$
3. Points for profile "Junior expert" Intramuros, (maximum possible 30):
 - Formula: $30 * \text{lowest daily rate offered among the tenderers who passed the quality award criteria thresholds} / \text{daily rate offered for offer under evaluation}$
4. Points for profile "Junior expert" Extramuros, (maximum possible 70):
 - Formula: $70 * \text{lowest daily rate offered among the tenderers who passed the quality award criteria thresholds} / \text{daily rate offered for offer under evaluation}$

TOTAL PRICE SCORE: 1. Points for profile "Senior expert" Intramuros + 2. Points for profile "Senior expert" Extramuros + 3. Points for profile "Junior expert" Intramuros + 4. Points for profile "Junior expert" Extramuros
